

THE HACKING LAB

TECH TALENT ACADEMY

Introducing The Hacking Lab

Suitable to be set as home learning

Good afternoon,

We would like to introduce our new Cyber Security programme for 16-19 year old students; The Hacking Lab which is **free** to your school.

This new programme is fully funded by the West Midlands Combined Authority and endorsed by the Regional Organised Crime Unit.

Due to the pandemic The Hacking Lab can be accessed as a pack for teachers to set as home learning. Sessions are pre recorded and easy to follow.

The Hacking Lab supports:

- 16-19-year-old student's coding journey
- the school's computer science curriculum
- the PSHE Ofsted requirement
- increasing awareness of cyber security and the opportunities it can bring.

During The Hacking Lab, the students will learn:

- Cyber Security 101 past and present
- Roles and skills of Cyber Security
- Network Security
- Cyber-attacks (Ransomware, Malware, Phishing)
- Cryptography Challenge

Cyber challenge download

The Hacking Lab is Neurodiverse-friendly. Many neurodiverse people find their natural home in focused tasks like coding. We support, safeguard and advocate to help these students reach their full potential.

Get access - email us!

Please email us for the answer to the cyber challenge.

If you would like to speak to a member of The Hacking Lab team, please let us know.

Kind regards,
TechTalent Academy
